USB Device Control & Monitoring Framework

Security Audit Report | v2.0

LOW RISK

Organization:	Your Organization Name
Generated:	27 July 2026 09:51:59
Classification:	CONFIDENTIAL -- Internal Use Only
Framework:	USB Device Control & Monitoring Framework v2.0

1. Executive Summary

16	1	0	0
Total Events	Authorized	Blocked	Critical Threats

USB Connect Events	**16**
Total Devices Detected	**1**
Authorized Devices	**1**
Blocked Devices	**0**
Suspicious Devices	**0**
Security Violations	**1**
File Operations Logged	**5**
Critical Threat Devices	**0**

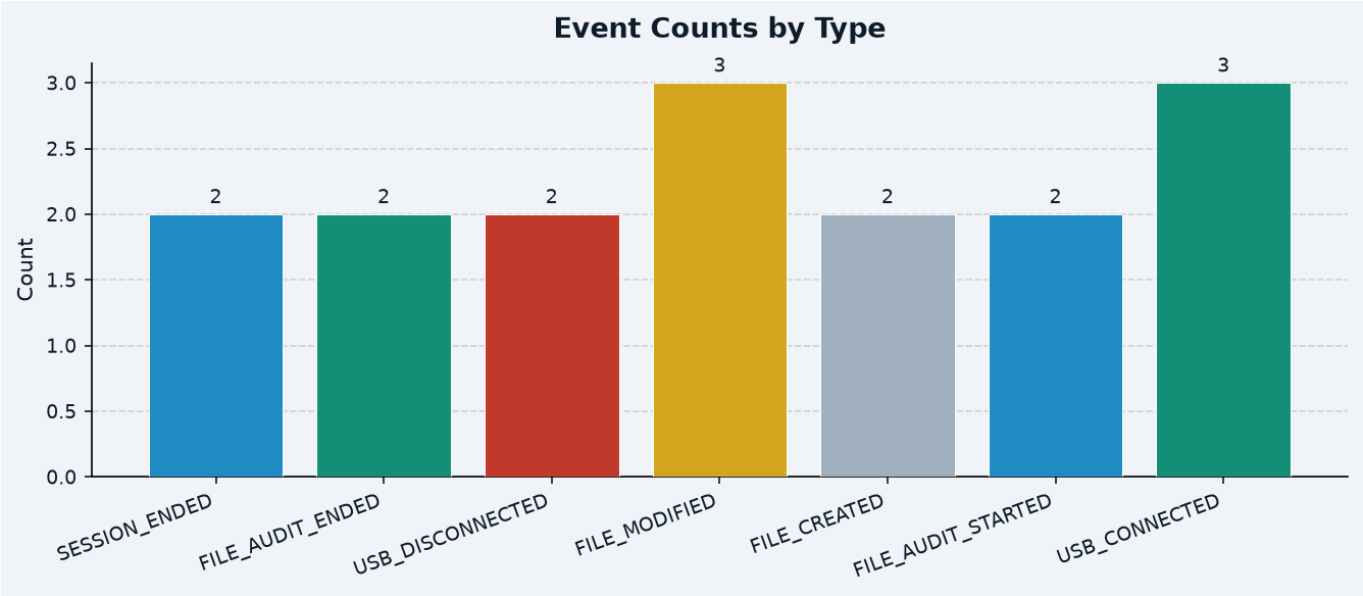

2. Risk Assessment

Overall Risk Level: LOW RISK

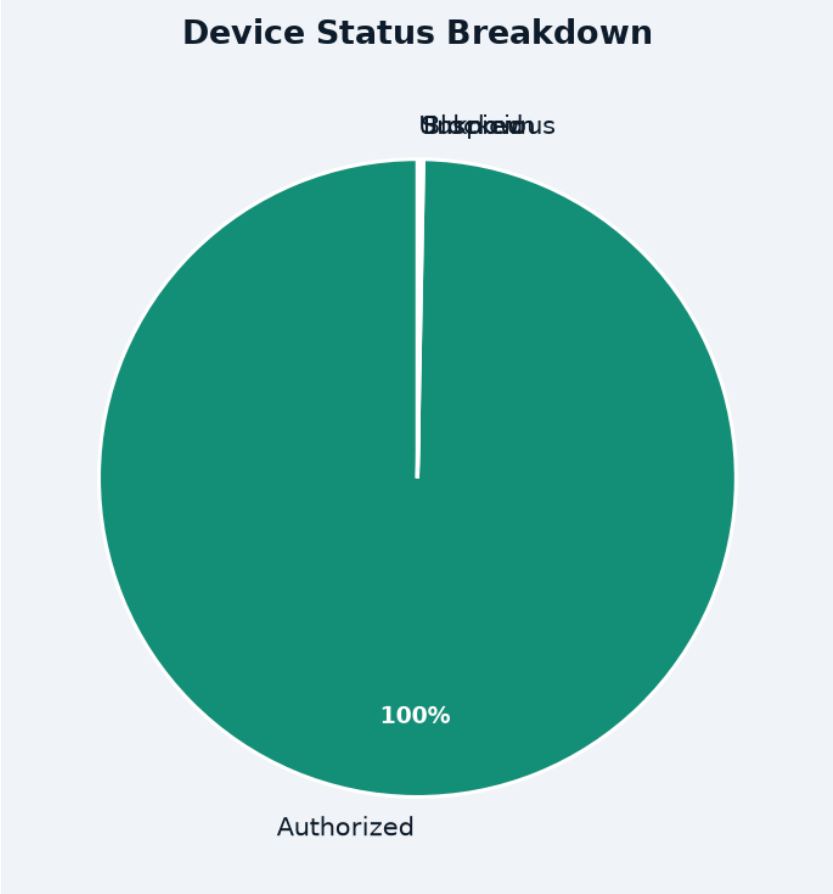

All detected devices appear authorized and within normal operational parameters. Continue routine monitoring.

3. Security Analytics Charts

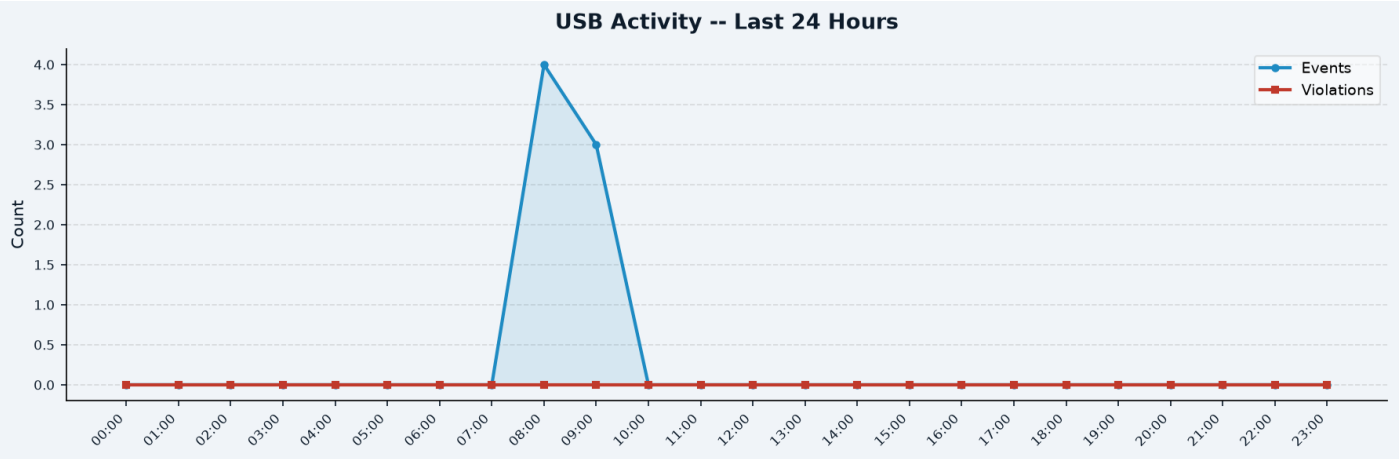

3.1 Event Types Distribution

3.2 Device Status Breakdown

4. Hourly Activity Timeline (Last 24 Hours)

5. Security Violations Log

Timestamp	Type	Device	Severity	Action
2026-07-25T00	UNAUTHORIZED_ACCESS	USB SanDisk 3.2Gen1 US	WARNING	Auto-blocked by enforc

6. Top Threat Devices

Device	VID	PID	Score	Level	Connections
USB SanDisk 3.2Gen1 USB Devi	0781	5581	5	LOW	3

7. File Transfer Activity

Time	Operation	File	Drive	Size	VID	PID	Serial
2026-07-27 08:32	FILE_MODIFIED	USB_Framework_FileAudit_Fi	D:\		0781	5581	04014158A56B
2026-07-27 08:32	FILE_CREATED	USB_Framework_FileAudit_Fi	D:\		0781	5581	04014158A56B
2026-07-25 00:34	FILE_MODIFIED	Netflix.lnk	D:\		0781	5581	04014158A56B
2026-07-25 00:34	FILE_CREATED	Netflix.lnk	D:\		0781	5581	04014158A56B
2026-07-25 00:34	FILE_MODIFIED	usb_transfer_test.txt	D:\		0781	5581	04014158A56B

8. Recommendations

1. Enforce this framework as a Windows Service for 24/7 persistent monitoring.
2. Store audit logs centrally in a SIEM (Splunk, Elastic, Microsoft Sentinel).
3. Apply Group Policy to restrict USB storage on all non-monitored endpoints.
4. Conduct quarterly allowlist reviews -- remove stale or terminated-user devices.
5. Cross-reference file SHA-256 hashes with VirusTotal for malware detection.
6. Train employees annually on USB security risks and insider threat awareness.
7. Implement role-based USB access control via Active Directory group membership.

This report was generated automatically by the USB Device Control & Monitoring Framework v2.0. All data sourced from usb_security.db.
